About Chevron College

Established in 2005, Chevron College is a QQI-accredited provider of further and higher education, delivering critical skills programmes to over 15,000 students annually. With 135 full-time staff and more than 250 industry-experienced tutors, we deliver training through eLearning, blended, and classroom-based formats to learners across the public and private sectors.

Renowned for student support, our tutors who have earned over 800 five-star Google reviews are patient, caring, and available by phone and email throughout the learner journey, from onboarding to assessment completion.

Chevron is ISO9001 accredited and has established partnerships with leading UK universities. We are an approved provider of Springboard+ funded programmes and a prime contracted training partner to Education and Training Boards (ETBs) across Ireland.

To ensure our programmes are financially accessible, we collaborate with Skillnets, the Higher Education Authority, ETBs, the Department of Social Protection, Local Employment Services, charities, and Flexifi.

President Karl Fitzpatrick, an EY Entrepreneur of the Year finalist, ensures our programmes remain industry-relevant and include valuable work-placement opportunities.

October 2027

AWARDING BODY:
University of East London

FORMAT:
Blended learning

DURATION:
3 Years

AWARD:
BSc (Hons) in Physiotherapy

WORK PLACEMENT:
1000 hours

About our Course

Chevron College is currently accepting enrolments for a 3-year Undergraduate Bachelor of Science (BSc.) Physiotherapy Degree which is being run in partnership with the University of East London.

Chevron College have a vision to educate highly-skilled Physiotherapists who will consistently provide critically-appraised, evidence-informed, and compassionate care to patients in diverse health environments.

Physiotherapists treat patients of all ages, helping them to maximise functional movement caused by accidents, illness and disability. Their expertise helps improve mobility, independence and quality of life. You'll learn how to communicate professionally and treat patients safely and effectively.

You will gain hands-on experience through clinical placements in the HSE & NHS and private sector, to prepare you for your physiotherapy career.

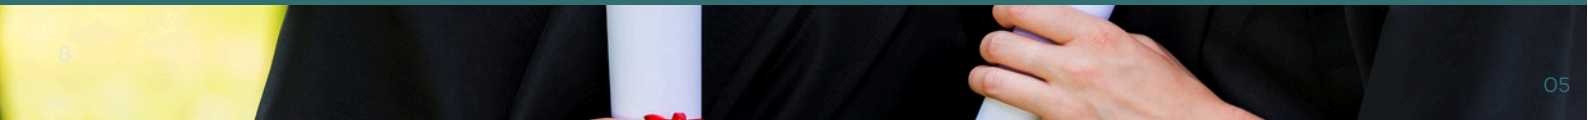

The programme will provide a high standard of evidence-based teaching to maximise clinical reasoning and critical thinking to prepare students for their physiotherapy career.

On graduation learners can apply directly to HCPC for registration in the UK. As the delivery of the award is by a team of lecturers outside of the UK, learners will apply to HCPC using the international applicant route. Once registered, HCPC registered Graduates can apply to CORU as international applicants for registration.

Qualifications Awarded

BSc Hons in Physiotherapy

Entry Requirements

Irish Leaving Certificate: specific grades required* approximately 450 CAO points

UK: 120 UCAS points or A level – BBB: specific grades required*

Equivalent International qualifications*

Mature learner route*

If English is not your first language you will be required to complete an I.E.L.T.S (International English Language Testing System). You will be required to obtain an IELTS overall score of 7.0 to be considered for this programme.

How is the Course Delivered

This blended programme is delivered over 3 academic years.

In year one of the programme learners will be required to be onsite for practical training for at least two days per week during term time. Practical days will be mainly scheduled on Tuesdays, Wednesdays, and some Fridays in year one. Practical days will be delivered in our custom-designed physiotherapy training rooms in Blanchardstown, Dublin. A study space is available between classes.

In addition, learners will attend some of their classes online. Online classes will be mainly scheduled on Mondays, Thursdays, and some Fridays in year one.

Learners are advised that the schedule of live classes and practical training will vary from year to year. Placement weeks will have full-time hours. In year one, there will be four weeks of placement from 16th March to 10th April 2026.

Our Training centre

Course Overview

Year 1	In your first year, you will explore the foundations of physiotherapy, including anatomy, physiology, and the principles of rehabilitation. You will begin to develop hands-on skills in assessment, therapeutic exercise, and manual techniques, while learning how to communicate effectively and build professional relationships. Emphasis is placed on understanding the fundamentals of rehabilitation and patient care, alongside academic and professional development. Academic modules are supported by early clinical experiences to help you connect theory to practice. Early clinical exposure will introduce you to real healthcare environments, preparing you for further placements. This year lays the groundwork for safe and person-centred care.
Year 2	In your second year, you will deepen your knowledge of musculoskeletal, respiratory, and neurological physiotherapy. Through problem-based learning, clinical reasoning, and patient case studies, you will develop a more nuanced understanding of complex presentations. You will gain confidence in delivering evidence-informed interventions and refining your communication, assessment, and treatment planning skills. A greater focus on interprofessional learning will support your understanding of collaborative practice. Longer and more diverse clinical placements will enhance your ability to apply knowledge in real-world settings, ensuring you grow in capability and independence.
Year 3	In your final year, you will consolidate your clinical expertise and prepare for autonomous practice. You'll take on more responsibility during placements, managing caseloads under supervision and contributing to multidisciplinary teams. You will critically evaluate evidence, apply advanced clinical reasoning, and reflect on your evolving professional identity. This final stage equips you with the confidence, competence, and adaptability to thrive in dynamic healthcare settings. Upon professionally registering after graduation, you will be fully equipped to begin a rewarding career as a physiotherapist in a wide range of roles.

Course Modules

YEAR 1	Anatomy and Assessment Skills 1	20 Credits
	Introduction to Physiology	20 Credits
	Anatomy, Assessment and Treatment Skills - Upper Limb	20 Credits
	Physiotherapy Clinical Skills	20 Credits
	Professional Practice (Mental Wealth)	20 Credits
	Introduction to Physiology 2	20 Credits
	Practice Based Learning 1	20 Credits
YEAR 2	Cardiovascular Physiotherapy	20 Credits
	Neurological Physiotherapy	20 Credits
	Research Methods	20 Credits
	Physiotherapy Rehabilitation	20 Credits
	Practice Based Learning 2	20 Credits
	Musculoskeletal Physiotherapy	20 Credits
YEAR 3	Practice Based Learning 3 (Elective)	20 Credits
	Complex Practice 1	20 Credits
	Practice Based Learning 4	20 Credits
	Research Governance and Leadership	20 Credits
	Complex Practice 2	20 Credits
	Neuromusculoskeletal Assessment and Trauma	20 Credits
	Practice Based Learning 5	20 Credits

Course Support

- Phone / E-mail support
- Weekly live webinars
- Highly Qualified full time in-house lecturers
- Access to study skills advisor
- Interaction and collaboration with other learners
- Access to a comprehensive e-library

Course Benefits

- Complete the programme within Ireland, avoiding significant costs relocating to UK or Holland
- Flexible blended learning programme allowing you to balance studies with personal & professional commitments
- Reduces the need for constant on-campus presence, saving on travel time and accommodation costs
- Lecturers with extensive industry and academic expertise
- Hands on practical experience in a diverse setting such as HSE, NHS & private sectors
- Evidence based teaching
- Programme prepares graduates for registration as Physiotherapists in Ireland and the UK
- Complete programme in 3 years
- Obtain a free Microsoft education licence & Student card benefits

Career Opportunities

Once professionally registers, graduates will be able to work in a diverse range of environments including hospitals and community settings. Some common employment opportunities for physiotherapy graduates include

- Hospitals

- Primary care
- Nursing homes
- Rehabilitation centres
- Private practice
- Non-governmental agencies
